Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems
- Knowledge of the design and consideration of privacy-preserving data processing procedures for smart and decentralized applications

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems
- Knowledge of the design and consideration of privacy-preserving data processing procedures for smart and decentralized applications
- Experience in prototyping such applications and systems

Lectures

- 17.04.2023 → Organization (L00) + Introduction (L01)
- 24.04.2023 → Circular Economy (L02)
- 08.05.2023 → Lifecycle Assessment – LCA (L03)
- 15.05.2023 → Introduction to the Internet of Things (L04)
- 22.05.2023 → Internet of Things – Communication + Security and Privacy (L05)
- 05.06.2023 → Internet of Things – Data Processing and BigData (L06)
→ Extra MOOC - Foodsharing
- 12.06.2023 → Industrial Internet of Things (L07)
- 19.06.2023 → Introduction to Blockchain Technology (L08)
- 26.06.2023 → Blockchain Technology – Consensus (L09)
- 03.07.2023 → Blockchain Technology – Ethereum and Smart Contracts (L10)
- 10.07.2023 → Blockchain Technology and Sustainability (L11)
- 17.07.2023 → Invited Lecture **XOR** The Machine-to-Everything Economy – A step towards the CE 2.0? (L12)
- 31.07.2023 → Exam Q&A

Exercises

- 17.04.2023 → Exercise 01 – Knowledge Test (MC)
- 24.04.2023 → Exercise 02 – Circular Economy (MC)
- 08.05.2023 → Exercise 03 – Lifecycle Assessment (LCA)
- 15.05.2023 → Exercise 04 – IoT Sensing and Gathering Data
- 22.05.2023 → Exercise 05 – IoT Security
- 05.06.2023 → Exercise 06 – IoT Data Processing
- 12.06.2023 → Exercise 07 – Industrial IoT
- 19.06.2023 → Exercise 08 – Blockchain (MC)
- 26.06.2023 → Exercise 09 – Blockchain Basics
- 03.07.2023 → Exercise 10 – Blockchain Consensus
- 10.07.2023 → Exercise 11 – Blockchain Tokens
- 17.07.2023 → Exercise 12 – Blockchain Smart Contracts and IoT

Course Organization

- Online course that is offered in parallel at the Clausthal University of Technology and the University of Göttingen
- Organization of the lecture:
 - Slides are available on Github ([Link](#))
 - Please report bugs!
 - Lectures and exercises as live stream (BBB – next slide)
 - Lecture recordings will be available on StudIP and on Github
 - Exercise time slots = Time for questions and eventual tutorials related to the exercises

Questions? Write us an email: etce-etce@tu-clausthal.de ← **We will only respond to emails written to this specific email address!**

Dates/Times/Locations

- Lecture:

- Monday **2:15 pm to 3:45 pm** (Berlin time) – **17.04.2023** to **17.07.2023**
- Location: Goslar Gotec (Am Stollen 19 C, 38640 Goslar, Germany) or via BigBlueButton ([Link](#))

- Exercise / Q&A:

- Monday **4 pm to 5 pm** (Berlin time) – **17.04.2023** to **17.07.2023**
- Location: Goslar Gotec (Am Stollen 19 C, 38640 Goslar, Germany) or via BigBlueButton ([Link](#))

Exercises

- Individual work → no group submissions
- Multiple-Choice or coding tasks
- 7-14 days to submit (depending on the task)
- Submission deadline is always Monday at 1:59pm (right before the next lecture)
- Submission of **each** exercise is **mandatory**
- **You pass by submitting an exercise - even if it is an empty page**
- You will receive feedback on your submission
- Exercise = learning feedback

Coding Exercise Submission and Grading - Clausthal and Göttingen

- Coding exercises are graded semi-automatically. Due to this it is highly important that you follow the required submission format. Otherwise the grading process will fail and you will receive 0 points.
- Code must use Python. Do not use any libraries beyond what is specified in the assignment as they may not be available in the grading environment.
- Follow the directory structure from the handout file **exactly**. Usually this means:
 - If the handout contains a folder 'lab1', your submission should have a folder 'lab1' in the archive with the files inside it. The folder must not be inside another folder and the files must not be directly in the archive outside the folder.
 - The archive must be an uncompressed **zip** archive, not tar, rar, tar.gz or anything else.

Coding Exercise Submission and Grading - Clausthal and Göttingen

- Before submitting, unpack your archive to a new folder and check that the Makefile runs correctly.
- For grading, we use a different test program, so, no, hardcoding the answers to the provided driver.py will not work.
- Code is submitted via a timed write-only StudIP submission folder. Only a single file can be submitted. The file name must follow the exact format 'lab<n>_<matriculation number>.zip', so for example 'lab4_123456789.zip', no extra space or _ symbols anywhere.

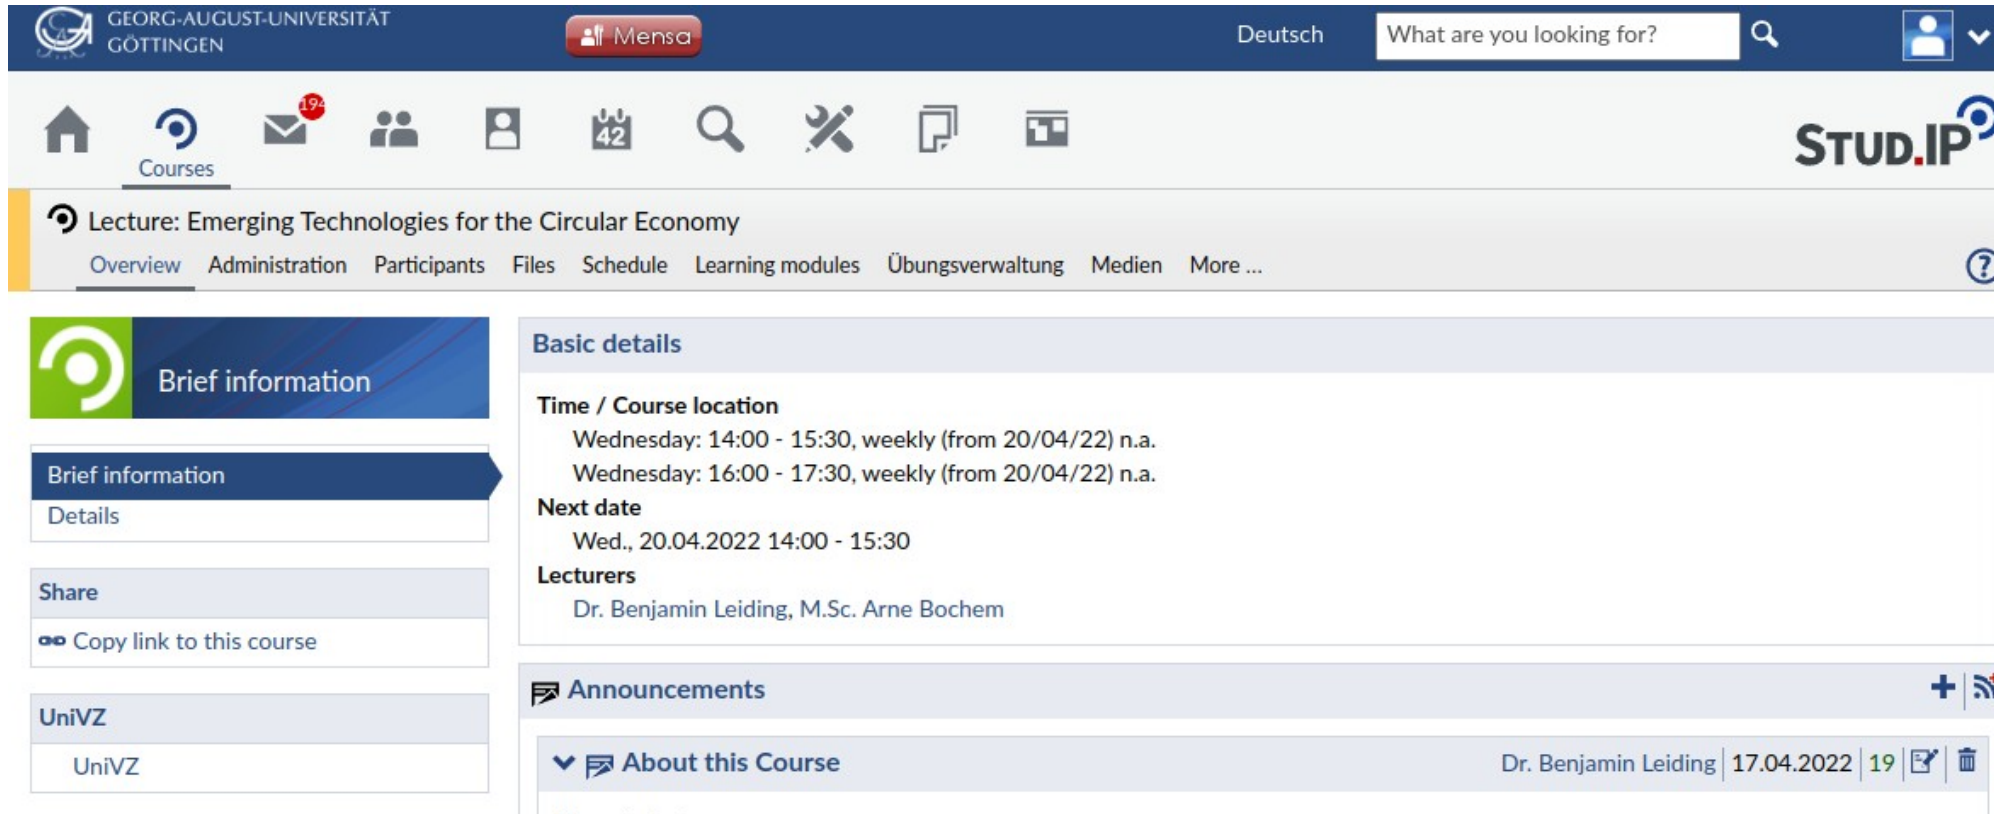

Multiple-Choice Exercises - Göttingen

Every student enrolled in this course is required to take the Knowledge quiz in first two weeks of the course.

-
- The first knowledge test will be available on ILIAS from **Monday, 17 April 2023, 5:00 PM until 24 April 2023 01:59 PM**
-
- The second knowledge test will be available on ILIAS from **Monday, 24 April 2023, 5:00 PM until 01 May 2023 01:59 PM**
-
- **Goal of the test:**
 - To check the knowledge level of the student that is relevant to this course of study.
-
- **Preparation:**
 - A review of basic concepts of Cryptography and Circular Economy is recommended for Week 1 and Week 2 respectively
 - Knowledge quiz for Week 1 only tests your existing knowledge.
-
- **Test structure:**
 - Total **25 multiple choice questions → no time limit.**
 - Each question can fetch a maximum of **1 point**
 - **IMPORTANT : Incorrect choices will yield in negative points.** An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.
 - Each test is evaluated on a **grade scale of 10.**
 - The result of your test will be available after the quiz is closed.

Multiple-Choice Exercises - Göttingen

Step-1: Navigate to StudIP, select "Lernmodule/Learning modules"

The screenshot shows the StudIP interface for the course "Lecture: Emerging Technologies for the Circular Economy". The top navigation bar includes the Georg-August-Universität Göttingen logo, a "Mensa" button, a language selector set to "Deutsch", a search bar, and a user profile icon. Below this is a row of icons for home, courses, messages (19), participants, profile, calendar (42), search, settings, and documents. The "Courses" icon is highlighted. The course title is displayed, followed by a tabbed menu with "Overview", "Administration", "Participants", "Files", "Schedule", "Learning modules", "Übungsverwaltung", "Medien", and "More ...". The "Learning modules" tab is active. On the left, a sidebar contains "Brief information" (selected), "Details", "Share" (with a "Copy link to this course" option), and "UniVZ". The main content area is divided into "Basic details" and "Announcements". The "Basic details" section lists the course location (Wednesday 14:00-15:30 and 16:00-17:30 weekly from 20/04/22), the next date (Wed., 20.04.2022 14:00 - 15:30), and the lecturers (Dr. Benjamin Leiding, M.Sc. Arne Bochem). The "Announcements" section shows a collapsed "About this Course" entry with a date of 17.04.2022 and a count of 19.

Multiple-Choice Exercises - Göttingen

Step-2: Use the dropdown arrow to select an available Test, and click on "Starten". This will take you to the ILIAS Page

The screenshot displays the ILIAS user interface. At the top, there is a navigation bar with icons for home, calendar, mail, users, profile, and search, along with the 'STUD.IP' logo. Below this, a red banner indicates the current course: 'Vorlesung: Emerging Technologies for the Circular Economy'. A menu bar below the banner includes links for 'Übersicht', 'Verwaltung', 'Forum', 'Teilnehmende', 'Dateien', 'Ablaufplan', 'Informationen', 'Wiki', 'Lernmodule' (which is underlined), 'Blubber', and 'Mehr ...'. On the left side, there is a sidebar with a 'Lernmodule' section containing a button 'Lernmodule dieser Einrichtung' and a link 'Lernmodule hinzufügen / entfernen'. Below this is an 'Aktionen' section with links for 'Externe Accounts verwalten' and 'Direkt zum Kurs in ILIAS - Lehre'. The main content area is titled 'Angebundene Lernmodule' and shows a list of modules. The first module is 'Knowledge Test: Week 1', which is linked to 'ILIAS - Lehre / ILIAS-Test'. Below the module name, there are two buttons: 'Starten' (highlighted with a red border) and 'Bearbeiten'. At the bottom of the main content area, a message states: 'Diese Veranstaltung ist mit einem Ilias-Kurs verknüpft. Hier gelangen Sie direkt in den Kurs: Kurs in ILIAS - Lehre'.

Multiple-Choice Exercises - Göttingen

Step-3: On ILIAS, to attempt the test, click on "Test Fortsetzen"

Multiple-Choice Exercises - Göttingen

Step-4: After answering a question, click on "Weiter" for the next question, and on "Test beenden" after you answer all questions

The screenshot shows a web interface for a "Knowledge Test: Week 1". At the top left is a green puzzle piece icon. Below it, a blue button labeled "Test beenden" is highlighted with a red rectangle. To the right, a green button labeled "Weiter →" is also highlighted with a red rectangle. Below these buttons is a section titled "Question" with a horizontal line underneath. Under the line, it says "Frage 1 von 2 (2 Punkte)" and "Nicht beantwortet (in Bearbeitung)". On the right side of this section is a link "Aktionen" with a downward arrow. The main content area is light blue and contains the question "Which of the following are True?". There are five radio button options: "False", "True", "False", "True", and "False". The second option, "True", is selected with a blue checkmark. A large blue question mark is visible on the right side of the question area.

Multiple-Choice Exercises - Clausthal

Every student enrolled in this course is required to take the Knowledge quiz in first two weeks of the course.

- The first knowledge test will be available on Moodle from **Monday, 17 April 2023, 5:00 PM until 24 April 2023 01:59 PM**
-
- The second knowledge test will be available on Moodle from **Monday, 24 April 2023, 5:00 PM until 01 May 2023 01:59 PM**
-
- **Goal of the test:**
 - To check the knowledge level of the student that is relevant to this course of study.
-
- **Preparation:**
 - A review of basic concepts of Cryptography and Circular Economy is recommended for Week 1 and Week 2 respectively
 - Knowledge quiz for Week 1 only tests your existing knowledge.
-
- **Test structure:**
 - Total **25 multiple choice questions → no time limit.**
 - Each question can fetch a maximum of **1 point**
 - **IMPORTANT : Incorrect choices will yield in negative points.** An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.
 - Each test is evaluated on a **grade scale of 10.**
 - The result of your test will be available after the quiz is closed.

Multiple-Choice Exercises - Clausthal

Step-1: Navigate to Moodle on your studip, select "Zum Kurs in Moodle"

The screenshot displays the TU Clausthal Stud.IP interface. At the top, a green header bar contains the text "TU Clausthal Stud.IP". Below this is a navigation bar with various icons, including a home icon with a red notification badge showing "23", a "Courses" icon, an envelope, a group of people, a user profile, a calendar, a magnifying glass, a wrench, a document, and a grid. The "Courses" icon is highlighted with a green underline. Below the navigation bar, the course title "Vorlesung + Übung: Emerging Technologies for the Circular Economy" is displayed. Underneath the title is a horizontal menu with links: "Overview", "Administration", "Participants", "Files", "Schedule", "Information", "Videoserver", "Alija", "Moodle" (highlighted with a green underline), and "More ...". Below the menu, there is a section for "Moodle" featuring a green background with a white "Moodle" text and a button labeled "Zum Kurs in Moodle". To the right of the "Moodle" section is a box containing the text "Information" and a message: "! Veranstaltung ist mit dem Kurs 'S 1635 Emerging Technologies for the Circular Economy (SS 2022)' in Moodle verknüpft." Below the "Information" box is an "Actions" section with a button labeled "Kursverknüpfung aufheben".

S 1635 Emerging Technologies for the Circular Economy (SS 2022)

[Dashboard](#) / [My courses](#) / [S 1635 Emerging Technologies for the Circular Economy \(SS 2022\)](#) / [General](#) / [Knowledge Quiz: Week 1](#)

Knowledge Quiz: Week 1

Every student enrolled in ETCE course is required to take the Knowledge quiz in first two weeks of the course.

Those students who will score at least 50% of the maximum grade in each of these knowledge tests are allowed to take this course further.

Each quiz contains 25 multiple choice questions. Each question may have one or more correct answers. The student is required to select all correct answers provided in the options, to be able to gain full points for the question.

IMPORTANT : Incorrect choices will yield in negative points. An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.

Attempts allowed: 1

The quiz will not be available until Wednesday, 20 April 2022, 5:00 PM

This quiz will close on Wednesday, 27 April 2022, 1:59 PM.

Time limit: 25 mins

[Preview quiz now](#)

Examination

- Prerequisite for admission to the final exam (all criteria have to be fulfilled):
 - Submit all exercises
- Final exam:
 - **Clausthal**
 - Written exam (120min) via Moodle
 - Date → Most likely **07.08.2023 from 2 pm - 5 pm**
 - **Göttingen**
 - Oral examination (20min) via BBB
 - Date → Most likely **08.08.2023**
