ETCE Research Group

- **E**merging **T**echnologies for the **C**ircular **E**conomy → **ETCE**
- Research focus:
 - Intersection of IT and sustainability
 - Circular Economy
 - Self-organized, decentralized and distributed systems
 - Machine-to-Everything Economy (M2X Economy)
- Other courses:
 - The Limits to Growth – Sustainability and the Circular Economy (SS/WS – open for everyone)
 - Requirements Engineering (WS – M.Sc.)

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems
- Knowledge of the design and consideration of privacy-preserving data processing procedures for smart and decentralized applications

Learning Outcome

- Basic understanding of the concept of the Linear Economy, the Circular Economy, the Performance Economy and sustainability
- Basic understanding of new technologies in the field of decentralized and smart systems
- Understanding and overview of the Internet of Things and related concepts
- Ability to design decentralized smart systems and applications in the context of connected sensor systems
- Knowledge of the design and consideration of privacy-preserving data processing procedures for smart and decentralized applications
- Experience in prototyping such applications and systems

Lectures

- 17.04.2023 → Organization (L00) + Introduction (L01)
- 24.04.2023 → Circular Economy (L02)
- 08.05.2023 → Lifecycle Assessment – LCA (L03)
- 15.05.2023 → Introduction to the Internet of Things (L04)
- 22.05.2023 → Internet of Things – Communication + Security and Privacy (L05)
- 05.06.2023 → Internet of Things – Data Processing and BigData (L06)
→ Extra MOOC - Foodsharing
- 12.06.2023 → Industrial Internet of Things (L07)
- 19.06.2023 → Introduction to Blockchain Technology (L08)
- 26.06.2023 → Blockchain Technology – Consensus (L09)
- 03.07.2023 → Blockchain Technology – Ethereum and Smart Contracts (L10)
- 10.07.2023 → Blockchain Technology and Sustainability (L11)
- 17.07.2023 → Invited Lecture **XOR** The Machine-to-Everything Economy – A step towards the CE 2.0? (L12)

Exercises

- 17.04.2023 → Exercise 01 – Knowledge Test (MC)
- 24.04.2023 → Exercise 02 – Circular Economy (MC)
- 08.05.2023 → Exercise 03 – Lifecycle Assessment (LCA)
- 15.05.2023 → Exercise 04 – IoT Sensing and Gathering Data
- 22.05.2023 → Exercise 05 – IoT Security
- 05.06.2023 → Exercise 06 – IoT Data Processing
- 12.06.2023 → Exercise 07 – Industrial IoT
- 19.06.2023 → Exercise 08 – Blockchain (MC)
- 26.06.2023 → Exercise 09 – Blockchain Basics
- 03.07.2023 → Exercise 10 – Blockchain Consensus
- 10.07.2023 → Exercise 11 – Blockchain Tokens
- 17.07.2023 → Exercise 12 – Blockchain Smart Contracts and IoT

Course Organization

- Online course that is offered in parallel at the Clausthal University of Technology and the University of Göttingen
- Organization of the lecture:
 - Slides will be uploaded to StudIP (Clausthal and Göttingen) and Github ([Link](#))
 - Please report bugs!
 - Lectures and exercises as live stream (BBB – next slide)
 - Lecture recordings will be available on StudIP and on Github
 - Exercise time slots = Time for questions and eventual tutorials related to the exercises

Questions? Write us an email: etce-etce@tu-clausthal.de ← **We will only respond to emails written to this specific email address!**

Dates/Times/Locations

- Lecture:

- Monday **2:15 pm to 3:45 pm** (Berlin time) – **17.04.2023** to **17.07.2023**
- Location: Goslar Gotec (Am Stollen 19 C, 38640 Goslar, Germany) or via BigBlueButton ([Link](#))

- Exercise / Q&A:

- Monday **4 pm to 5 pm** (Berlin time) – **17.04.2023** to **17.07.2023**
- Location: Goslar Gotec (Am Stollen 19 C, 38640 Goslar, Germany) or via BigBlueButton ([Link](#))

Exercises

- Individual work → no group submissions
- Multiple-Choice or coding tasks
- 7-14 days to submit (depending on the task)
- Submission deadline is always Monday at 1:59pm (right before the next lecture)
- Submission of **each** exercise is **mandatory**
- **You pass by submitting an exercise - even if it is an empty page**
- You will receive feedback on your submission
- Exercise = learning feedback

Coding Exercise Submission and Grading - Clausthal and Göttingen

- Coding exercises are graded semi-automatically. Due to this it is highly important that you follow the required submission format. Otherwise the grading process will fail and you will receive 0 points.
- Code must use Python. Do not use any libraries beyond what is specified in the assignment as they may not be available in the grading environment.
- Follow the directory structure from the handout file **exactly**. Usually this means:
 - If the handout contains a folder 'lab1', your submission should have a folder 'lab1' in the archive with the files inside it. The folder must not be inside another folder and the files must not be directly in the archive outside the folder.
 - The archive must be an uncompressed **zip** archive, not tar, rar, tar.gz or anything else.

Coding Exercise Submission and Grading - Clausthal and Göttingen

- Before submitting, unpack your archive to a new folder and check that the Makefile runs correctly.
- For grading, we use a different test program, so, no, hardcoding the answers to the provided driver.py will not work.
- Code is submitted via a timed write-only StudIP submission folder. Only a single file can be submitted. The file name must follow the exact format 'lab<n>_<matriculation number>.zip', so for example 'lab4_123456789.zip', no extra space or _ symbols anywhere.

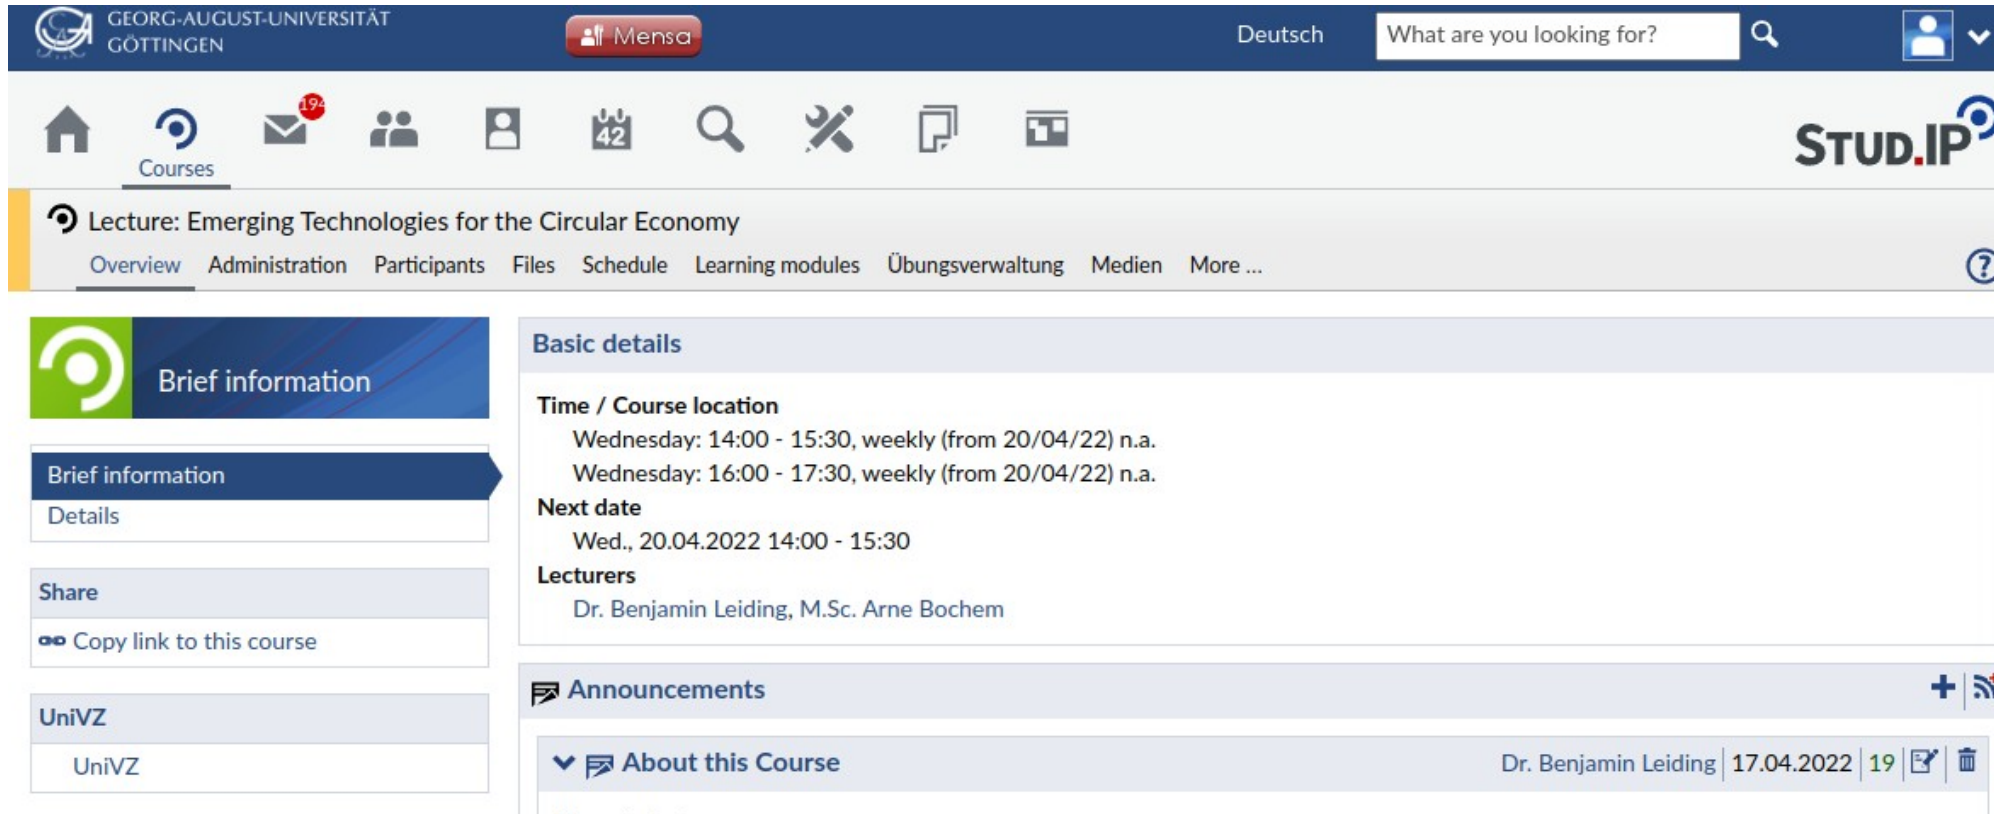

Multiple-Choice Exercises - Göttingen

Every student enrolled in this course is required to take the Knowledge quiz in first two weeks of the course.

-
- The first knowledge test will be available on ILIAS from **Monday, 17 April 2023, 5:00 PM until 24 April 2023 01:59 PM**
-
- The second knowledge test will be available on ILIAS from **Monday, 24 April 2023, 5:00 PM until 01 May 2023 01:59 PM**
-
- **Goal of the test:**
 - To check the knowledge level of the student that is relevant to this course of study.
-
- **Preparation:**
 - A review of basic concepts of Cryptography and Circular Economy is recommended for Week 1 and Week 2 respectively
 - Knowledge quiz for Week 1 only tests your existing knowledge.
-
- **Test structure:**
 - Total **25 multiple choice questions → no time limit.**
 - Each question can fetch a maximum of **1 point**
 - **IMPORTANT : Incorrect choices will yield in negative points.** An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.
 - Each test is evaluated on a **grade scale of 10.**
 - The result of your test will be available after the quiz is closed.

Multiple-Choice Exercises - Göttingen

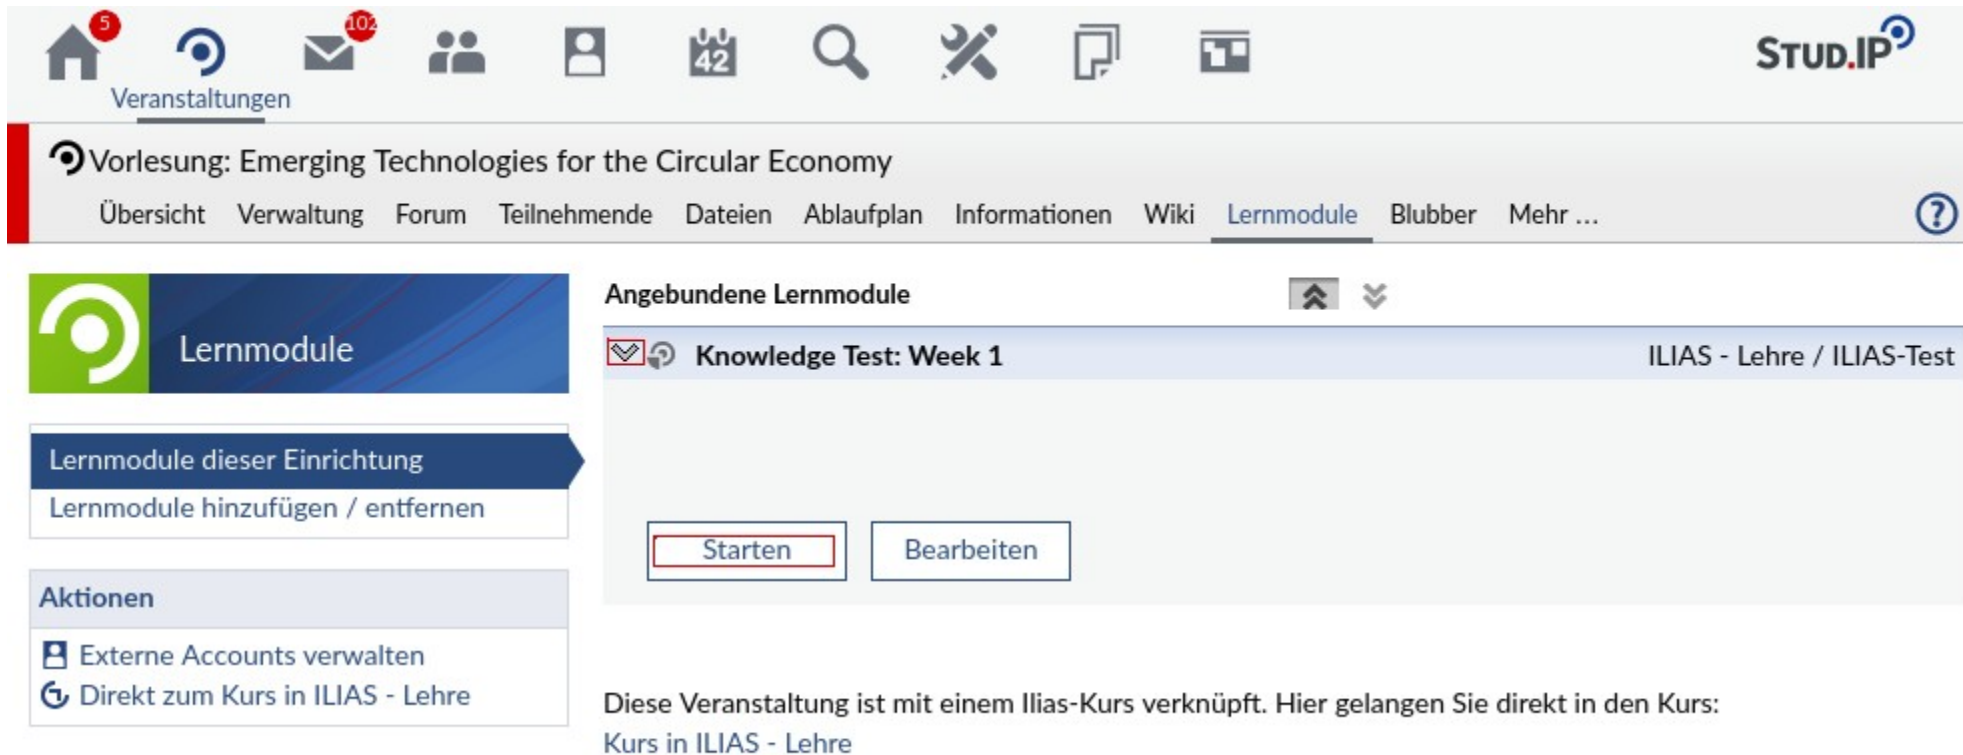

Step-1: Navigate to StudIP, select "Lernmodule/Learning modules"

The screenshot shows the StudIP interface for the course "Lecture: Emerging Technologies for the Circular Economy". The top navigation bar includes the Georg-August-Universität Göttingen logo, a "Mensa" button, a language selector set to "Deutsch", a search bar, and a user profile icon. Below this is a row of icons for home, courses, messages (19), participants, profile, calendar (42), search, settings, and documents. The "Courses" icon is highlighted. The course title is displayed, followed by a tabbed interface with "Overview", "Administration", "Participants", "Files", "Schedule", "Learning modules", "Übungsverwaltung", "Medien", and "More ...". The "Learning modules" tab is active. On the left, a sidebar contains "Brief information" (selected), "Details", "Share" (with a "Copy link to this course" option), and "UniVZ". The main content area is divided into "Basic details" and "Announcements". The "Basic details" section lists the course location (Wednesday 14:00-15:30 and 16:00-17:30 weekly from 20/04/22), the next date (Wed., 20.04.2022 14:00 - 15:30), and the lecturers (Dr. Benjamin Leiding, M.Sc. Arne Bochem). The "Announcements" section shows a collapsed "About this Course" entry with a date of 17.04.2022 and a count of 19.

Multiple-Choice Exercises - Göttingen

Step-2: Use the dropdown arrow to select an available Test, and click on "Starten". This will take you to the ILIAS Page

The screenshot shows the ILIAS user interface. At the top, there is a navigation bar with icons for home, calendar, mail, users, profile, calendar, search, settings, and documents. The 'Veranstaltungen' (Events) tab is active. Below this, the course title 'Vorlesung: Emerging Technologies for the Circular Economy' is displayed, along with a list of navigation links: Übersicht, Verwaltung, Forum, Teilnehmende, Dateien, Ablaufplan, Informationen, Wiki, Lernmodule (highlighted), Blubber, and Mehr ... A help icon (?) is also present.

On the left side, there is a sidebar with a green 'Lernmodule' (Learning Modules) header. Below it, there are sections for 'Lernmodule dieser Einrichtung' (Learning Modules of this institution) with a link to 'Lernmodule hinzufügen / entfernen' (Add / Remove learning modules), and 'Aktionen' (Actions) with links to 'Externe Accounts verwalten' (Manage external accounts) and 'Direkt zum Kurs in ILIAS - Lehre' (Direct to the course in ILIAS - Teaching).

The main content area is titled 'Angebundene Lernmodule' (Attached Learning Modules) and features a dropdown arrow. Below this, a table lists the attached modules. The first entry is 'Knowledge Test: Week 1', which is linked to 'ILIAS - Lehre / ILIAS-Test'. Below the table, there are two buttons: 'Starten' (Start) and 'Bearbeiten' (Edit). The 'Starten' button is highlighted with a red border.

At the bottom of the main content area, there is a message: 'Diese Veranstaltung ist mit einem Ilias-Kurs verknüpft. Hier gelangen Sie direkt in den Kurs: Kurs in ILIAS - Lehre' (This event is linked to an ILIAS course. Here you can go directly to the course: Course in ILIAS - Teaching).

Multiple-Choice Exercises - Göttingen

Step-3: On ILIAS, to attempt the test, click on "Test Fortsetzen"

Georg-August-Universität Göttingen

Multiple-Choice Exercises - Göttingen

Step-4: After answering a question, click on "Weiter" for the next question, and on "Test beenden" after you answer all questions

The screenshot shows a web interface for a "Knowledge Test: Week 1". At the top left is a puzzle piece icon. Below the title, there are two buttons: "Test beenden" (Test end) on the left and "Weiter →" (Next) on the right, both highlighted with red boxes. The main section is titled "Question" and contains the text "Frage 1 von 2 (2 Punkte)" and "Nicht beantwortet (in Bearbeitung)". On the right side of this section is a dropdown menu labeled "Aktionen". The question itself is "Which of the following are True?". There are five radio button options: "False", "True", "False", "True", and "False". The second option, "True", is selected with a blue checkmark. A large blue question mark is visible on the right side of the question area.

- ☐ False

Multiple-Choice Exercises - Clausthal

Every student enrolled in this course is required to take the Knowledge quiz in first two weeks of the course.

- The first knowledge test will be available on Moodle from **Monday, 17 April 2023, 5:00 PM until 24 April 2023 01:59 PM**
-
- The second knowledge test will be available on Moodle from **Monday, 24 April 2023, 5:00 PM until 01 May 2023 01:59 PM**
-
- **Goal of the test:**
 - To check the knowledge level of the student that is relevant to this course of study.
-
- **Preparation:**
 - A review of basic concepts of Cryptography and Circular Economy is recommended for Week 1 and Week 2 respectively
 - Knowledge quiz for Week 1 only tests your existing knowledge.
-
- **Test structure:**
 - Total **25 multiple choice questions → no time limit.**
 - Each question can fetch a maximum of **1 point**
 - **IMPORTANT : Incorrect choices will yield in negative points.** An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.
 - Each test is evaluated on a **grade scale of 10.**
 - The result of your test will be available after the quiz is closed.

Multiple-Choice Exercises - Clausthal

Step-1: Navigate to Moodle on your studip, select "Zum Kurs in Moodle"

The screenshot shows the TU Clausthal Stud.IP interface. At the top, there is a green header with 'TU Clausthal Stud.IP'. Below it is a navigation bar with icons for Home, Courses, Mail, Users, Profile, Calendar, Search, Tools, and Documents. The 'Courses' icon is highlighted. Below the navigation bar, the course title 'Vorlesung + Übung: Emerging Technologies for the Circular Economy' is displayed. Underneath the course title is a menu with links: Overview, Administration, Participants, Files, Schedule, Information, Videoserver, Alija, Moodle (highlighted), and More ... Below the menu, there is a section for 'Moodle' with a green background and a button labeled 'Zum Kurs in Moodle'. Below this section, there is an 'Information' box with a warning icon and text: 'Veranstaltung ist mit dem Kurs "S 1635 Emerging Technologies for the Circular Economy (SS 2022)" in Moodle verknüpft.' Below the information box, there is an 'Actions' box with a link: 'Kursverknüpfung aufheben'.

Multiple-Choice Exercises - Clausthal

Step-2 : Select "Knowledge Quiz - Week 1"

S 1635 Emerging Technologies for the Circular Economy (SS 2022)

[Dashboard](#) / [My courses](#) / [S 1635 Emerging Technologies for the Circular Economy \(SS 2022\)](#) / [General](#) / [Knowledge Quiz: Week 1](#)

Knowledge Quiz: Week 1

Every student enrolled in ETCE course is required to take the Knowledge quiz in first two weeks of the course.

Those students who will score at least 50% of the maximum grade in each of these knowledge tests are allowed to take this course further.

Each quiz contains 25 multiple choice questions. Each question may have one or more correct answers. The student is required to select all correct answers provided in the options, to be able to gain full points for the question.

IMPORTANT : Incorrect choices will yield in negative points. An incorrect choice in a question will take away **just as many points** as a correct choice is awarded.

Attempts allowed: 1

The quiz will not be available until Wednesday, 20 April 2022, 5:00 PM

This quiz will close on Wednesday, 27 April 2022, 1:59 PM.

Time limit: 25 mins

Examination

- Prerequisite for admission to the final exam (all criteria have to be fulfilled):
 - Submit all exercises

- Final exam:
 - **Clausthal**
 - Written exam (120min) via Moodle
 - Date → Most likely **07.08.2023 from 2 pm - 5 pm**
 - **Göttingen**
 - Oral examination (20min) via BBB
 - Date → Most likely **08.08.2023**

Self-Study Star

Self-Study Star → 

- Slides with the self-study star indicate optional/additional study material that is **not** mandatory but could be helpful or interesting
