Requirements Engineering
Exercise – 2

Published on: 25.11.2024 - 4:00 PM

Deadline: 02.12.2024 – 1:59 PM

Submission location: Moodle Course Page

Task(s):

Submission guidlines:

- max. 3 pages

- Please upload a valid PDF file.

- Please review and finalize your submission once you have uploaded all files and then click the Submit button.

Scenario: Your company has been tasked with the development of a university information system for teaching, learning and research. and research (Hochschulinformationssystem für Lehre, Studium und Forschung (LSF)). It offers options for recording, managing and displaying courses and research projects as well as the associated resources (facilities, people, rooms). The LSF is used as a study information, course management and planning system, so that different user groups can be effectively supported in their specific planning activities. Moreover, students can plan their studies more easily, and may use the system to access study and examination information.

Task(s):

1. Identify and list the relevant project stakeholders.

2. Identify three applicable elicitation techniques and briefly list advantages/disadvantages in the context of the given scenario.

3. Prepare an interview with ten questions (choosing any one of your listed stakeholders) following the guidelines outlined in the elicitation lecture.

4. What are the advantages and disadvantages of the interview elicitation approach? What could be a complementary approach?
