

Exercise – 2

Published on: 18.06.2026

Deadline: 01.07.2026 – 1:59pm

Task(s):

LCA – Part 1 (Goal and Scope Definition + LCI)

Task 1

- Attend the LIVE Session after the lecture on 18.06.2026, Submit the following to [cocalc](#), following the instructions given during the interactive exercise period:
 - Lifecycle Inventory Data (For the washing machine that use to clean your clothes at home, determine the following):
 - Water usage (Liters) (use the „eco“ wash-cycle as a template for this exercise)
 - Energy usage (kWh)
 - Time required (seconds)
 - Detergent usage (grams/mL) (if applicable)
 - Cost (EUR) (if applicable)
 - Water source: Find out where water for your home comes from. (Provide links to the source of this information)
 - Energy source: Find out where the electricity for your home is being supplied from. If it is a mixture of renewable and non-renewable sources of electricity, be sure to include the percentage of the mix, e.g. 50% wind, 50% coal. (Provide links to the source of this information)
 - Water Treatment: Find out where the dirty water (that goes down the drain after a washcycle) ends up. Usually this information is available from your local municipality.
- Submit your results on Cocalc ONLY. For **1,2,3,4, & 5** use the formular on „[LCI-Data-Survey.ipynb](#)“ to insert data. Upload a PDF file to the same folder with your results for **6,7 & 8**.

PS: The exercise on cocalc might be named (E03), but it still refers to this exercise, so please do not be alarmed.
